The key changes include but are not limited to:

- Updated disclosure of fees and costs
- Updated summary of risk level

Full details of the changes can be found in the PDS. As always, we recommend you read this document to understand the main benefits and risks of investing, along with other features of the Funds. Indirect investors should also consider the Target Market Determination (TMD) for a Fund before making an investment decision to consider whether a Fund is appropriate for them. TMDs in respect of the Funds are available at [amp.com.au/investments-tmd](https://amp.com.au/investments-tmd).

### Updated disclosure of fees and costs

While there have been no changes to the fee structure that applies, our estimates of certain fees and costs for the Funds have been updated following our latest review, to ensure they accurately reflect the costs of managing the Funds. Full details can be found in the PDS.

Further information and frequently asked questions can also be found online at [amp.com.au/investments/legal-and-regulatory-information/rg97-and-fee-information](https://amp.com.au/investments/legal-and-regulatory-information/rg97-and-fee-information).

### Updated summary of risk level

Following a regular review, the Risk Band (and Risk Label) is being updated from previously being 'Medium to High' (5) to now being 'High' (6).

**A risk band of 5** means we estimate the number of negative annual returns over any 20-year period would be in the range of 3 to less than 4.

**A risk band of 6** means we estimate the number of negative annual returns over any 20-year period would be in the range of 4 to less than 6.
