

International Share Index (Hedged)

Quarterly Investment Option Update

30 June 2025

Aim and Strategy

The strategy aims to provide returns that closely match the MSCI World (ex-Australia, ex-Tobacco) Accumulation Index with net dividends re-invested (100% hedged to Australian dollars) before fees and taxes. Exposure to the international shares asset class will be attained through the use of low cost index-focused investment managers. Note: A currency hedged strategy attempts to reduce the impact of movements in the Australian dollar, relative to other currencies where the portfolio holds exposure, to smooth net performance.

Currency Overlay	1.38
Asia ex Japan	0.98
Australasia	0.05
Cash	-0.52

Fund Performance

The Investment Option produced an extremely strong June quarter return, as global sharemarkets rose to new highs despite volatility earlier in the period due to US tariff announcements. Over the full financial year, returns were into double-digit territory.

Market Review

International shares had a strong June quarter, closing the period up by 9.5% in local currency terms. (In Australian dollar terms the return was 5.9% as the Australian dollar strengthened against the US dollar.) This was despite pockets of market panic seen earlier in the quarter caused by the US administration's 'Liberation Day' tariff rate announcements, where double-digit falls were temporarily seen in many indices before markets steadily recovered to achieve new all-time highs by the end of June. The bullish sentiment was driven by trade talks between the US and partners such as Canada, Mexico, the EU and Japan, as well as optimism around US-China negotiations. Corporate earnings, particularly in the US, also remained robust, while growing expectations of lower interest rates from the Fed also helped. Emerging markets' shares produced robust returns (+7.9%), though slightly underperformed their developed peers amid trade deals tilting to be more favourable for the US, with higher tariffs significantly impacting emerging markets. (All returns quoted are in local currency terms and on a total-return basis, unless otherwise stated.)

Outlook

While shorter-term risks remain around trade policy uncertainty, geopolitical tension, and high valuations in some areas, fundamentals remain reasonable, with interest rates falling in most regions on the back of significantly decreased levels of inflation. Central banks also have scope to cut further, if recession risks rise. Regardless, for longer-term investors, we believe a diverse basket of businesses, bought at reasonable prices, particularly those with strong competitive advantage that generate high amounts of cash from their shareholders' capital, will serve investors well over the long-term.
