TAL provides contemporary insurance cover as well as innovative digital services, online claims processes and holistic health and wellbeing programs to help you stay healthy, and if you do become ill, to return to your best health and return to work.

## Investment choices to suit your needs and goals

### Choose your own investment options

Set your own level of risk to match your goals and stage of life. Select from our range of 27 options—including single sector and multi-sector investment options utilising active multi-manager or index style investing. We also offer cash and term deposits.

### Let us do the work for you

AMP MySuper Lifestages is designed to evolve and align with the changing stages of your life. It takes the hard work out of deciding how to invest your super, by offering a single investment option tailored for your age. When you're younger it seeks higher returns through growth assets such as shares. And then as you approach retirement, the mix shifts to more defensive assets like fixed interest to help reduce risk.

### Here's how MySuper Lifestages works

You can switch between investment options at any time—a list of available options can be found in your [Investment Guide](#). The performance of your super fund can make a big difference to your lifestyle when you retire. You can see how all of your investment options are performing by visiting [amp.com.au/performance](http://amp.com.au/performance)
