Professional Conservative

Aim and strategy: To provide investors with modest investment returns, with reasonably limited fluctuations in the value of their investment from year to year. The investment option invests in a diversified mix of primarily defensive assets, across a range of complementary underlying managers selected for their expertise in an asset class or investment approach.

This diversification provides investors with the potential for a more stable risk-return profile than would be achieved by investing in a single asset class or manager.

Suggested minimum investment timeframe: 3 years

Relative risk: 4/Medium

Aims to distribute: Half-yearly

Asset class	Long-term benchmark (%)	Strategic range (%)
Australian shares	11	0 - 26
Global shares ⁽¹⁾	14	0 - 39

Growth	35	15 - 55
Defensive	65	45 - 85

Please note: The long-term benchmark and ranges are effective from 1 October 2023. Actual asset allocations may differ to those shown above.

1. May include emerging markets and private equity.
2. May include Australian and global listed and unlisted property.
3. May include Australian and global listed and unlisted infrastructure.
4. May include both defensive and growth alternative assets, such as hedge funds and absolute return strategies.
5. May include government bonds and credit (investment grade and sub-investment grade).

We aim to manage asset allocations within the asset allocation ranges. However, in certain circumstances, we may manage actual asset allocation outside of the asset allocation ranges. Such circumstances may include but are not limited to where one of the underlying funds is closed to new applications or withdrawals, during changes to the product structure, asset allocation or manager line-up, or in certain market conditions. The investment option will not deviate outside the asset allocation ranges to pursue investment opportunities based on short-term expectations.

Conservative Index

Aim and strategy: To provide returns primarily from income as well as some capital growth over the short to medium term, by investing mainly in defensive assets with some exposure to growth assets. Exposure to individual asset classes will be attained through the use of index-focussed investment managers. This investment option seeks to provide an index-focused solution to diversified investing. Through a process of diversified market analysis combined with selection of the most appropriate investment managers for each underlying asset class, this investment is designed to provide market tracking returns over the suggested investment timeframe. Global shares may be partially or fully hedged back to Australian dollars.

Future Directions International Bond

Aim and strategy: To provide a total return (income and capital growth) after costs and before tax, higher than the return from the Bloomberg Global Aggregate Index (hedged back to Australian dollars) on a rolling three-year basis. This investment option invests in a diversified portfolio of short-and long-term global fixed income securities that may include government, government-related, corporate, asset backed and hybrid securities in both developed and emerging markets.

Suggested minimum investment timeframe: 5 years

Relative risk: 5/ Medium to high

Aims to distribute: Quarterly

Schroder Fixed Income

Aim and strategy: To obtain exposure to a range of domestic and international fixed income assets with the objective of outperforming the Bloomberg AusBond Composite 0+Yr Index, whilst delivering stable absolute returns over time. The strategy adopts a Core-Plus investment approach whereby a core portfolio comprising of Australian investment grade bonds (including government, semi-government, supranational and corporate bonds) is complemented by investments in a diverse range of global and domestic fixed income securities. The targeted result is a defensive strategy which is broadly diversified with low correlation to equity markets.

Suggested minimum investment timeframe: 3 years
