Indirect investors should also consider the Target Market Determination (TMD) before making an investment decision to ensure they form part of the target market of the Options. A TMD in respect of each Option is available at [amp.com.au/investments-tmd](http://amp.com.au/investments-tmd).

### Updated contact details and branding

As AMP continues to simplify our business, you will see branding changes to communications such as emails, letters and reports.

Part of these changes include new contact details for AMP Investments Client Services Team. For any enquiries, you can contact our Client Services Team on 133 267 or via email at [ampinvestments@amp.com.au](mailto:ampinvestments@amp.com.au).

### Enhanced disclosure of fees and costs

We are changing the way we display fees and costs in the PDS, as part of new regulations which are mandatory from 30 September 2022. The new disclosures provides further enhancements to fees and costs disclosure changes which were made in 2017.

The PDS now includes net transaction costs and buy/sell spreads in the 'Summary of Fees' table, as well as including net transaction costs in the 'Example of annual fees and costs'.

It is important to note these fees and costs have always existed and been factored into your net-of-fee returns. We are simply changing the way they are displayed and incorporating some extra breakdown of costs into the worked examples.

**Key information about how we show fees and costs:**

- You will see **new fees and costs disclosure** in the PDS.
- You are **not being charged** additional fees or costs.
- These changes do **not impact** your net-of-fee returns.
- These fees and costs **have always existed**, we are simply changing the way they are displayed.

Full details can be found in the PDS. Further information and frequently asked questions can also be found at [amp.com.au/investments](http://amp.com.au/investments).

**Change of investment timeframe**

We have also updated the Options’ suggested minimum investment timeframe, as listed in the table below.

Fund	New suggested minimum investment timeframe	Previous suggested minimum investment timeframe
Growth	7 years	6 years
High Growth	10 years	6 years

**Updated Summary of risk level**

We have also updated the Risk bands and Risk labels, as listed in the table below:

Fund	New Risk band	New Risk label	Previous Risk band	Previous Risk label
Moderately Defensive	6	Very high	5	Medium to high

A risk band of 5 means we estimate the number of negative annual returns over any 20-year period would be in the range of 3 to less than 4.

A risk band of 6 means we estimate the number of negative annual returns over any 20-year period would be in the range of 4 to less than 6.

**Updated asset allocations**

We regularly review the long-term asset mix (long-term benchmark) and strategic asset mix ranges of the Options, and we can rebalance the asset mix within the strategic ranges, where necessary, to suit market conditions. Following our latest review, the long-term benchmark has been updated as shown in the table below.

Please note: The asset allocations shown below will be progressively implemented from 1 October 2022. Actual asset allocations as at the date of this PDS may differ to these allocations.
