As part of these reviews, the trustee has decided to terminate the AMP Capital Ethical Leaders investment range from our master trust products, to be replaced with a new ethically focussed investment strategy, the Pandal Sustainable Balanced investment option. The document outlines the investment aim and strategy, target asset allocation and fee structure for the new option within this product set against the strategies that it is replacing.

New investment option - Pandal Sustainable Balanced

Aim and strategy

The option aims to provide a return (before fees, and expenses) that exceeds the option's benchmark over the medium to long term. The benchmark for the option is created from a weighted composite of market indices with reference to the option's neutral asset allocation. The option invests in Australian and international shares, Australian and international property securities, unlisted property (including infrastructure), Australian and international fixed interest, cash and alternative investments. The option may also use derivatives. Sustainable and ethical investment practices are incorporated into the Australian and international shares, Australian and international fixed interest and part of the Alternative investment components of the option. Pandal actively seek exposure to securities and industries that demonstrate leading ESG and ethical practices and exclude companies not meeting the investable criteria.
