

AMP Capital Multi Asset

Quarterly Investment Option Update

31 March 2020

Aim and Strategy

To provide a total return (income and capital growth) before costs and tax of 5.5% pa above the trimmed mean Consumer Price Index (CPI) on a rolling five-year basis by investing in a diversified portfolio with broad asset allocation ranges. The portfolio invests across a range of traditional asset classes such as shares, credit, cash, fixed income and property, and is further diversified by investment in alternative assets, such as infrastructure and absolute return strategies, which are generally more illiquid. Exposure to a broad range of asset classes is achieved either through investment in underlying investments or direct investment into an asset. Set within a dynamic asset allocation framework, the portfolio's asset classes and asset allocation ranges are determined with reference to the portfolio's risk and liquidity guidelines. Asset class allocation and ranges may vary at any stage of the investment cycle. There is no guarantee that the asset allocation strategy will provide positive returns at all stages of the investment cycle. Throughout the investment cycle, when necessary, the portfolio will be rebalanced with the aim of ensuring that exposure to illiquid assets is no greater than 20% of the portfolio. The portfolio may also have exposure to currencies through both actively-managed investment strategies and risk management processes. International investments may be partially or fully hedged back to Australian dollars. The portfolio and its underlying managers or direct investments may use derivatives such as options, futures, forwards and swaps. The investment manager imposes restrictions on the use of derivatives within the portfolio and monitors the implementation of these restrictions in accordance with their risk management processes on the use of derivatives. Underlying managers or strategies in which the portfolio invests may use short selling.

Cash	N/A
Defensive Alternatives	N/A
Growth Alternatives	N/A
International Fixed Interest	N/A
International shares	N/A
Listed Property and Infrastructure	N/A
Unlisted Property and Infrastructure	N/A

Actual Allocation	%
Cash	32.92
International Equities	20.35
Defensive Alternatives	17.94
Fixed Income and Credit	7.64
Australian Equities	7.51
Direct Assets	7.32
Listed Real Assets	5.68
Growth Alternatives	4.16

Fund Performance

The Fund was sharply negative over the quarter as broader markets plummeted due to the COVID-19 crisis. Heading into March, we had adjusted the Fund to be more defensively positioned and have been focused on protecting capital amid the extreme market volatility. Positively, social distancing is proving effective at slowing the spread of the virus and governments have responded strongly by providing large amounts of stimulus, liquidity and support programmes to allow businesses to better ride-out virus-related shutdowns.

Market Review

The first quarter of 2020 began with the renewed conflicts between the US and Iran and the US-China trade tensions which were later resolved and share markets were encouraged by initial signs the global economy was improving. However, as March approached, the global surge in COVID-19 cases outside of China led to a pandemic. At the end of the quarter, despite the continued rise in new COVID-19 cases (especially in the US and Italy) and signs of a slowdown in global economic activity, share markets had a strong rebound in response to further announcements of unprecedented stimulus measures by governments and central banks.

The Federal Reserve reduced interest rates by a further 100 basis points to 0.00%–0.25% and commenced its quantitative easing. The US government announced the largest fiscal package, worth \$US2 trillion. The Bank of Canada lowered its overnight rate target to 0.75% and launched a credit facility program.

In Europe, the UK officially left the European Union on 31 January. The European Central Bank launched a new Pandemic Emergency Purchase Programme, worth €750 billion. The Bank of England lowered its Bank Rate further and launched a new substantial quantitative easing program whilst the UK government announced its credit guarantees.

In Asia, China's central bank announced a reduction in reserve ratios for banks. The Bank of Japan provided a significant liquidity injection and expanded its quantitative easing program.

Outlook

The virus looks to be moving towards containment in Australia and other countries. We are tracking the daily trajectory of new cases, as well as the rate of change, with an eye on a slowing daily rate of change in US and Europe as important green shoots. Importantly, there are already very large fiscal backstops to wages and credit that have been put into place. Significant central bank liquidity support should also help support markets going forward, though we expect high volatility levels to remain. We believe as the virus comes under control, manufacturing will regain momentum and pent up demand will be high. This, combined with large fiscal support packages and interest rates around historic lows may lead to an attractive scenario for equity markets.

Availability

Product Name	APIR
AMP Flexible Lifetime Super	AMP1709AU
AMP Flexible Super - Retirement account	AMP1768AU
AMP Flexible Super - Super account	AMP1756AU
