Quarterly Investment Option Update

30 June 2022

## Aim and Strategy

The option invests in a portfolio of assets diversified across asset classes, sources of returns (from different asset types) and investment managers. Exposure to these assets can be through investment in underlying funds, or through direct investment into an asset. The option may be suitable for investors seeking exposure to a portfolio of diversified assets with the potential to deliver stable, risk-adjusted returns above inflation. The option is managed with a focus on income and franking credits for investors in retirement, who are drawing pension payments that are exempt from taxation. The option has been designed specifically for investors in or close to retirement.

## Market Review

The June quarter saw pessimistic global sentiment continue to drive further falls across various markets and asset classes, as traders began to price in a growing likelihood of recession, against a backdrop of hawkish central banks aggressively hiking rates to combat inflation. There were however some positive through the quarter, with China pulling-back some of its harsh COVID restrictions providing some much-necessary relief on ports and supply chains, as well as some tentative signs that goods inflationary pressure in the US may be slightly easing. Russia's war on Ukraine meanwhile rolled on, wreaking havoc on global energy markets, particularly in Europe – not to mention the terrible human cost.
