

AMP Secure Growth

Quarterly Investment Option Update

30 June 2016

Aim and Strategy

Aim and strategy: To provide returns (after fees and before-tax) which exceed inflation over the longer term, but with lower returns and less variability of returns than would be expected from an investment option with the same exposure to bonds, cash, shares and property. The investment strategy is to invest in a diversified portfolio with a core of cash and bonds and limited exposure to shares and property. Changes to investments can be made according to the outlook for the various investment sectors and the nature of the plan. This is a crediting rate investment option.

Assurance: Investors are protected from capital losses at specified times (see page [1](#) for more information).
